

present for the second time the

Summer School in Clinical Investigation in Zurich

03. – 07. September 2019

This 4 days-long program will help clinicians and clinician-scientists to build skills in clinical investigation with a particular focus on preventive trials, to increase knowledge in statistical analysis, and to connect to a community of like-minded researchers.

The curriculum includes sessions on:

- Complexity of Preventive Trials
- Data & Safety Monitoring Board Mock Sessions
- Quantitative Methods for Benefit-Harm Analysis
- Alternatives to RCTs
- Subgroup Analysis in Clinical Trials
- And much more!

Learn from experts of the University of Zurich, Harvard Medical School and Monash University, including Milo Puhan, Ajay Singh, Julie Buring, David DeMets, Torsten Hothorn, John McNeil and Miguel Hernan
